

AMENDMENTS

Please amend the above-identified application as follows:

*In The Claims*

Please substitute the following claim 36 for claim 36 currently pending in this application:

SUB  
DI

C/

36. (Three Times Amended) A printed circuit board comprising:  
a printed wiring board;  
a plurality of components mounted on said printed wiring board; and  
an electrically continuous conformal coating for conformingly adhering to  
surfaces of one or more regions of the printed circuit board to which the  
conformal coating is applied, comprising,  
a conductive coating that prevents the electromagnetic waves from passing  
therethrough, said conductive coating conformingly adhered to the surface of the  
one or more regions of the printed circuit board, and  
a dielectric coating interposed between said conductive coating and  
predetermined portions of each of the one or more printed circuit board regions,  
wherein said dielectric coating is conformingly adhered to and insulates said  
predetermined portions of the one or more printed circuit board regions,  
whereby said conductive coating and said dielectric coating each do not  
significantly change dimensions of said printed wiring board and said plurality of  
components in said one or more printed circuit board regions to which said conformal  
coating is applied.
